PREFACE

From its beginning in 1936, the Agricultural Conservation Program (ACP) has been applicable to the 50 States, Puerto Rico, and the Virgin Islands, and has been available as a public financial aid to share costs with farmers and ranchers for carrying out soil, water, woodland, and pollution abatement practices.

During the period 1971 through 1973, the program was known as the Rural Environmental Assistance Program (REAP) and in 1974 as the Rural Environmental Conservation Program (RECP), with basically the same goals and purposes. In 1975 the name was changed back to ACP.

This booklet presents a statistical summary of selected conservation ACP from 1936 through 1980. Some practices are not shown separately combinations and/or title changes for the practices have been used similar practice data are summarized with backup tables for a separate the information was available.

Further details on the ACP are available from the ACP annual summary.

NOTE: Beginning with the next issuance of this publication, data will cover the 5-year period only--1981 through 1985. For data covering the 45-year statistical summary.
